 AIR QUALITY DIVISION
 ACTIVITY REPORT: Scheduled Inspection

P023729889

FACILITY: O.I.L Energy Corp. - Whitewater 9 CPF		SRN / ID: P0237
LOCATION: T28N R9W SEC 9, TRAVERSE CITY		DISTRICT: Cadillac
CITY: TRAVERSE CITY		COUNTY: GRAND TRAVERSE
CONTACT: Pat Thon , Field		ACTIVITY DATE: 06/10/2015
STAFF: Shane Nixon	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: on site inspection and records review		
RESOLVED COMPLAINTS:		

AQD staff sent a letter to Mr. Pat Thon, OIL Energy Corporation, requesting records for the Whitewater 9 facility in Grand Traverse County. The purpose of the records was to determine the facility's compliance with the recordkeeping requirements of Permit to Install No. 59-11. AQD staff received a telephone call from Mr. Brandon McDowell explaining the facility has not operated since September 2011 and the compressor engine was removed from the site in October 2011. AQD staff conveyed that the Permit to Install was no longer valid since the compressor engine was removed and a new compressor could not be installed without obtaining a new Permit to Install. Mr. McDowell explained that he wanted to speak with the company's consultant prior to taking action on voiding the Permit to Install. Permit to Install void procedures was provided to Mr. McDowell via email.

AQD staff visited the site on June 10 and determined the compressor was indeed removed from the site; however, the glycol dehydrator is onsite. The glycol dehydrator processes natural gas from the Antrim formation and is exempt from permitting pursuant to Rule 288(b)(ii). AQD staff intends to follow up with Mr. McDowell to inquire if he contacted his consultant.
