Noshin Khan  
Environmental Engineer  
Air Quality Division  
Department of Environment, Great Lakes and Energy

Dear Noshin Khan:

In response to your Violation Notice SRN: P0301, Oakland County, we have changed our processes.

Mechanical De-Rusting of Metal Parts: This is no longer done outside. We are designating areas inside our facility when this process is required.

Plasma Cutting: This accessory that was added to our robotic welding machine, has been decommissioned. We had purchased the plasma, as a trial, for a process needed for a future job, it was not efficient. We ended up outsourcing the cutting process. The only time this equipment was used was during that evaluation period.

Sincerely,

Greg Dani

Chief Operating Officer  
State Fabricators, Inc.
