AIR QUALITY DIVISION
ACTIVITY REPORT: On-site Inspection

P047963208

FACILITY: COMPOSITECH		SRN / ID: P0479
LOCATION: 683 LINCOLN LAKE AVENUE SE, LOWELL		DISTRICT: Grand Rapids
CITY: LOWELL		COUNTY: KENT
CONTACT: Ken Fusee , General Manager		ACTIVITY DATE: 06/02/2022
STAFF: Michael Cox	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Self Initiated Unannounced Inspection		
RESOLVED COMPLAINTS:		

On June 2, 2022, AQD Staff Michael Cox (MTC) conducted a self-initiated inspection of Composittech located at 683 Lincoln Lake Avenue SE, Lowell, MI 49331. The purpose of the inspection was to verify compliance with state and federal air pollution regulations and determine the operating status of the facility.

Facility Description:

Composittech historically consisted of filament winding, and molding equipment for the production of resin-based piping, storage tanks and custom designed process equipment. The facility was considered a synthetic minor source of hazardous air pollutants (HAPs) and volatile organic compounds (VOCs) under PTI No. 172-13. PTI No. 172-13 was voided on March 23, 2021.

Compliance Evaluation:

MTC arrived on site at approximately 10:00 am. Mr. Larry Haas, Project Manager, for Universal Blastco was contacted on-site to conduct a walkthrough of the facility formerly utilized by Composittech. Both Universal Blastco and Composittech are owned by the same parent company, Industrial Services Group. No visible emissions or odors were noted upon arrival. MTC questioned Mr. Haas on the status of Composittech. Mr. Haas stated that the facility is now closed and is no longer on site and the buildings formerly occupied by Composittech are now being utilized by Universal Blastco for warehousing materials, tools, and various other equipment to service the papermill industry. MTC verified that all associated production equipment had been removed from the site location.

Compliance Determination:

Based on the on-site evaluation and voided PTI No. 172-13, Composittech was noted to be closed and no longer in production. Production equipment was noted to be removed from the site location. This facility can be marked as permanently closed for SRN: P0479.
