AIR QUALITY DIVISION
ACTIVITY REPORT: Self Initiated Inspection

P067943799

FACILITY: CLIFF A MESSING EXC, INC.		SRN / ID: P0679
LOCATION: 8826 E. HURON LINE ROAD, RUTH		DISTRICT: Saginaw Bay
CITY: RUTH		COUNTY: HURON
CONTACT: Cliff Messing , President/Owner		ACTIVITY DATE: 03/09/2018
STAFF: Matthew Karl	COMPLIANCE STATUS: Non Compliance	SOURCE CLASS:
SUBJECT: Self initiated inspection of Cliff A. Messing Exc, INC. (P0679) to determine compliance with PTI 11-16. Also provided assistance with completing MAERS report.		
RESOLVED COMPLAINTS:		

I (Matt Karl) arrived on site to conduct an inspection of the facility to determine compliance with PTI 11-16 and to assist Cliff Messing with his MAERS report.

The facility consists of a combination of process equipment (screens, crushers, feeders, conveyors, etc.) used to reduce larger materials down to smaller sizes, classify and sort materials into various product types, material handling and transporting of material to storage areas. Control methods include water sprays. The facility required a case-by-case permit to install (PTI) because the site does not meet the requirements of the General PTI for crushers, due to the fact that there are residences and businesses located close to the crusher.

Upon arrival on the site, I was given a tour of the facility by Cliff Messing and his son. The facility was currently not running, and the equipment was largely snow covered. However, I made note that the main crusher unit was on site, and that power is still provided to the facility by a 250 kW diesel generator. During the facility walk through, Cliff Messing informed me that they had installed a smaller crusher unit, a Pioneer Jaw Crusher 10-36 unit and an additional return conveyor 24-34 during the past year's crusher season. This was a violation of 40 CFR Part 60, Subpart OOO the federal New Source Performance Standards (NSPS) for Nonmetallic Mineral Processing and Michigan Rule 201 Permit to Install.

A violation notice was sent out on 3/14/18.
