Dear Mr. Krooswyk:

**VIOLATION NOTICE**

On March 19, 2019, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Our Daily Bread located at 3000 Kraft Avenue SE, Grand Rapids, Michigan. The purpose of this inspection was to determine Our Daily Bread's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and to investigate a complaint which was received on March 19, 2019 regarding burnt odors and smoke attributed to Our Daily Bread's operations.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Ink press with regenerative thermal oxidizer (RTO)	Rule 301	AQD staff observed excessive smoke emitted out of the bypass stack on Our Daily Bread's building.
Ink Press with regenerative thermal oxidizer	Rule 910	The emissions capture and control system was not working properly.

During the inspection, it was noted that emissions from the heat set ink printing process were venting through a bypass vent on the roof and not completely exhausted to or controlled by the RTO. As a result, visible smoke was observed coming from the bypass stack in excess of emissions allowed by Rule 301 of the administrative rules promulgated under Act 451.

On March 8, 2019, Our Daily Bread submitted a written response to similar violations previously cited in a Violation Notice dated February 20, 2019. In that response, Our Daily Bread indicated that actions had been taken, including replacing gas valves and changing an RTO control setting, to address previously cited violations. Despite these actions, additional violations exists.
