RE: FGCRUSHING violation

Dear Ms. Jenine Camilleri,

I am writing in response to a violation dated 7-15-20, specifically FGCRUSHING SC IV.2 of PTI 83-19 design/equipment parameters, FGCRUSHING SC V.1 of PTI 83-19 testing and FGCRUSHING SC VI.3 of PTI 83-19 monitoring/record keeping. This violation occurred from lack of knowing a belt scale, daily record keeping and an emissions test are required. As of 8-28-20, we have installed a belt scale. As of 8-1-20, I have started keeping daily records of amount of material produced and when chloride is applied for dust control. On 8-17-20, I signed an agreement with Fishbeck Engineers to do a visible emissions test. I am waiting to hear back from them on a date to test. In summary, two of the violations have been corrected and the third is waiting scheduling by the engineers, with a signed service agreement. I do apologize for not being compliant. I will contact Shamin as soon as the testing is complete. Please contact me with any further concerns. Thank you!

Sincerely,

Stephen J. Messina
Manager/VP
