Dear Mr. Aldridge:

**VIOLATION NOTICE**

On October 11, 2019, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of South Flint Gravel located at 6090 Belford Road, Holly, Michigan, 48442. The purpose of this inspection was to determine South Flint Gravel's compliance with the requirements of the Federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and to investigate a recent inquiry which we received on October 7, 2019, regarding soil and sedimentation trackout material causing fugitive dust along Dixie Highway attributed to the facility's operations.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Fugitive Dust	R 336.1901	A person shall not permit or cause the emission of an air containment that causes injurious effects to human health, safety, or the unreasonable interference with the comfortable enjoyment of property. Sedimentation and soil trackout material extends from the facility's property onto a public highway causing a potential safety hazard for drivers.

In the professional judgment of AQD staff, the fugitive dust observed was of sufficient intensity, frequency and duration so as to constitute a violation of Rule 901 of the administrative rules promulgated under Act 451.
