

January 31, 2025

Dear Craig and Jason,

In response to the violation notice for 213 E Main Street in Harrisville, we began demolition of the building on December 26th and it ended on December 30th, 2024. All material was taken to Whitefeather Landfill in Pinconning. The building was in disrepair and posed safety concerns; the front of the building was ready to fall into the city sidewalk. Prior to demolition the building department was consulted and a demolition permit was secured through the county. There was no mention of any other requirements from the county. Following the demolition, Mark's conversation with Craig Dechy was extremely informative and moving forward if any other demolition needs to be done Mark feels comfortable with the expectations and requirements. The cement slab with the asbestos tile has not been removed but Mark will submit a notice of intent to the state before it is removed. The asbestos tiles will be removed by a licensed asbestos abatement contractor. As requested, Dave Keyser Excavating registered with Asbestos NESHAP.

We sincerely apologize for our errors and feel that we are now much more knowledgeable.

Mark Sullivan
