

To Whom It Concerns

I am replying to a violation notice received For Craig Dechy from EGLE with SRN/ID: U322400273

I am responding both from the Harbor Beach Area Fire Department and TJC Holdwick Farms. Neither party involved ever new anything about this air quality permits or rules for using a house for training. Its something we just go and do for trainings once and awhile. Since this letter has been received and a visit with MR. Dechy, We understand that we have to do things different TJC farms have properly disposed of what was left of the foundation and the fire department has become registered in the system so we can have the buildings inspected and turn in the form 10 days prior. We did not know anything about any of these processes that we had to go through until the visit. If you have any question, feel free to contact me at (989) 315-1489
