AIR QUALITY DIVISION
ACTIVITY REPORT: Self Initiated Inspection**

U41190135447663

FACILITY: Accuform Industries, Inc.		SRN / ID: U411901354
LOCATION: 1701 Broadway Avenue NW, Grand Rapids		DISTRICT: Grand Rapids
CITY: Grand Rapids		COUNTY: KENT
CONTACT: Mark Holleman , Owner		ACTIVITY DATE: 01/24/2019
STAFF: Adam Shaffer	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: Self-Initiated Inspection		
RESOLVED COMPLAINTS:		

Air Quality Division (AQD) staff Adam Shaffer (AS) arrived at the Accuform Industries, Inc. (AI) facility located in Grand Rapids, MI at 1:18pm on January 24, 2019, to complete a self-initiated inspection.

Facility Description

Prior to entering the facility, off-site odors and visible emission observations were completed. The weather conditions at the time of the inspection were winds from the west/southwest at 10-15mph, mid 20's °F, and cloudy skies with light snow. A slight coating odor was noted to the west of the facility that appeared to be from a site further to the west. No visible emissions were noted.

Upon arrival, AQD staff AS met with Mr. Mark A. Holleman, Owner, who provided a tour of the facility and answered site specific questions. AI is a metal fabrication facility that utilizes exemptions for all on-site operations. The company consists of two divisions which are Accuform Metal Products, Inc., and Fascias Incorporated.

Additional Observations

- One paint booth with an associated stack was observed during the course of the inspection. The booth had clearly not recently been in operation and was verified by Mr. Holleman to have not been in use for at least the past ten years.
- Various types of metal fabrication were observed during the course of the inspection including drilling, grinding, bending, shearing and routing of metal and/or plastic parts. The equipment observed is vented internally and appears to be exempt per Rule 285(2)(l)(i) or 285(2)(l)(vi)(B).
- A welding area was observed during the course of the site inspection that appears to be exempt per Rule 285(2)(i).

Conclusion

Based on the facility walk through, AI appears to be in compliance with all application air pollution control rules at this time.
