RE: Violation Notice SRN/ID: U47110552, Livingston County

Good afternoon,

Firstly, I would like to thank you for coming to our facility on June 26<sup>th</sup>, 2019 and conducting a compliance inspection of our shop at Truck-Tech Refurbishing, Inc. In response to the violations that we received, please see below.

In response to Violation to Rule 201, AQD staff provided us with the Exemption Handbook Rule 287(2)(c) and we found that we are in compliance with all (3) criteria of not exceeding more than 200 gallons of material per month, our booth exhaust system is furnished with dry filters for spray material control and we keep all records of paint materials used per month of coatings.

In response to Violation to Rule 910, air cleaning devices and dry filter control will be monitored and maintained to ensure proper installation at all times and maintain proper air pollution reduction practices.

In response to Violation to Rule 370, used blasting media is currently being disposed of by Waste Management following the TCLP Report conducted by Safety-Kleen Systems, Inc. We are now aware that we are required to have a designated holding box for used media waiting for disposal pick-up in order to control air pollution and reduce contaminants to the outer air.

I hope that you find these responses to be satisfactory and again, appreciate your time in conducting the compliance inspection of our facility.

Thank you,

Steve Phillips
