

## NOTICE of COMMENT PERIOD and PUBLIC HEARING

The Michigan Department of Environment, Great Lakes, and Energy (EGLE) is holding a public comment period and a public hearing to allow the public the opportunity to comment on the proposed conditional approval of an air permit.

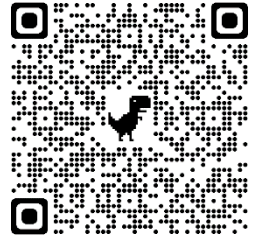

**There is a public comment period from January 9, 2024 until February 15, 2024, and a public hearing on February 8, 2024 for:**

**Company:** Universal Coating, Inc located at 5204 Energy Drive, Flint, Michigan

**What Universal Coating, Inc wants to do:** Application No. [APP-2023-0147](#) is for the installation and operation of two new tumble spray coating lines. No emission increases were requested above the existing permitted emission limits.

**Technical Details:** The public comment period and public hearing are to allow all interested parties the opportunity to comment on the proposed conditional approval of a Permit to Install (PTI). It has been preliminarily determined that the installation of new equipment will not violate any of EGLE's rules nor the National Ambient Air Quality Standards.

Additionally, the installation of new equipment will require revisions to Renewable Operating Permit (ROP) No. [MI-ROP-N7256-2017b](#) (SRN N7256). This public comment period meets the public participation requirements for a future administrative amendment to the ROP.
