MICHIGAN DEPARTMENT OF ENVIRONMENT, GREAT LAKES, AND ENERGY AIR QUALITY DIVISION

November 19, 2021

PERMIT TO INSTALL 96-21

ISSUED TO Stealthcraft Boats, LLC

LOCATED AT 6771 South Astor Road Baldwin, Michigan 49304

IN THE COUNTY OF

Lake

STATE REGISTRATION NUMBER P1202

The Air Quality Division has approved this Permit to Install, pursuant to the delegation of authority from the Michigan Department of Environment, Great Lakes, and Energy. This permit is hereby issued in accordance with and subject to Section 5505(1) of Article II, Chapter I, Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. Pursuant to Air Pollution Control Rule 336.1201(1), this permit constitutes the permittee's authority to install the identified emission unit(s) in accordance with all administrative rules of the Department and the attached conditions. Operation of the emission unit(s) identified in this Permit to Install is allowed pursuant to Rule 336.1201(6).

DATE OF RECEIPT OF ALL INFORMATION REQUIRED BY RULE 203:

June 21, 2021

DATE PERMIT TO INSTALL APPROVED: November 19, 2021	SIGNATURE:

GENERAL CONDITIONS

- 1. The process or process equipment covered by this permit shall not be reconstructed, relocated, or modified, unless a Permit to Install authorizing such action is issued by the Department, except to the extent such action is exempt from the Permit to Install requirements by any applicable rule. (**R 336.1201(1)**)
- 2. If the installation, construction, reconstruction, relocation, or modification of the equipment for which this permit has been approved has not commenced within 18 months, or has been interrupted for 18 months, this permit shall become void unless otherwise authorized by the Department. Furthermore, the permittee or the designated authorized agent shall notify the Department via the Supervisor, Permit Section, Air Quality Division, Michigan Department of Environment, Great Lakes, and Energy, P.O. Box 30260, Lansing, Michigan 48909-7760, if it is decided not to pursue the installation, construction, reconstruction, relocation, or modification of the equipment allowed by this Permit to Install. (R 336.1201(4))
- 3. If this Permit to Install is issued for a process or process equipment located at a stationary source that is not subject to the Renewable Operating Permit program requirements pursuant to Rule 210 (R 336.1210), operation of the process or process equipment is allowed by this permit if the equipment performs in accordance with the terms and conditions of this Permit to Install. (R 336.1201(6)(b))
- 4. The Department may, after notice and opportunity for a hearing, revoke this Permit to Install if evidence indicates the process or process equipment is not performing in accordance with the terms and conditions of this permit or is violating the Department's rules or the Clean Air Act. (R 336.1201(8), Section 5510 of Act 451, PA 1994)
- 5. The terms and conditions of this Permit to Install shall apply to any person or legal entity that now or hereafter owns or operates the process or process equipment at the location authorized by this Permit to Install. If the new owner or operator submits a written request to the Department pursuant to Rule 219 and the Department approves the request, this permit will be amended to reflect the change of ownership or operational control. The request must include all of the information required by subrules (1)(a), (b), and (c) of Rule 219 and shall be sent to the District Supervisor, Air Quality Division, Michigan Department of Environment, Great Lakes, and Energy. (R 336.1219)
- 6. Operation of this equipment shall not result in the emission of an air contaminant which causes injurious effects to human health or safety, animal life, plant life of significant economic value, or property, or which causes unreasonable interference with the comfortable enjoyment of life and property. (**R 336.1901**)
- 7. The permittee shall provide notice of an abnormal condition, start-up, shutdown, or malfunction that results in emissions of a hazardous or toxic air pollutant which continue for more than one hour in excess of any applicable standard or limitation, or emissions of any air contaminant continuing for more than two hours in excess of an applicable standard or limitation, as required in Rule 912, to the Department. The notice shall be provided not later than two business days after start-up, shutdown, or discovery of the abnormal condition or malfunction. Written reports, if required, must be filed with the Department within 10 days after the start-up or shutdown occurred, within 10 days after the abnormal condition or malfunction has been corrected, or within 30 days of discovery of the abnormal condition or malfunction, whichever is first. The written reports shall include all of the information required in Rule 912(5). (**R 336.1912**)
- 8. Approval of this permit does not exempt the permittee from complying with any future applicable requirements which may be promulgated under Part 55 of 1994 PA 451, as amended or the Federal Clean Air Act.
- 9. Approval of this permit does not obviate the necessity of obtaining such permits or approvals from other units of government as required by law.
- 10. Operation of this equipment may be subject to other requirements of Part 55 of 1994 PA 451, as amended and the rules promulgated thereunder.

- 11. Except as provided in subrules (2) and (3) or unless the special conditions of the Permit to Install include an alternate opacity limit established pursuant to subrule (4) of Rule 301, the permittee shall not cause or permit to be discharged into the outer air from a process or process equipment a visible emission of density greater than the most stringent of the following. The grading of visible emissions shall be determined in accordance with Rule 303 (R 336.1303). (R 336.1301)
 - a) A six-minute average of 20 percent opacity, except for one six-minute average per hour of not more than 27 percent opacity.
 - b) A visible emission limit specified by an applicable federal new source performance standard.
 - c) A visible emission limit specified as a condition of this Permit to Install.
- 12. Collected air contaminants shall be removed as necessary to maintain the equipment at the required operating efficiency. The collection and disposal of air contaminants shall be performed in a manner so as to minimize the introduction of contaminants to the outer air. Transport of collected air contaminants in Priority I and II areas requires the use of material handling methods specified in Rule 370(2). (**R 336.1370**)
- 13. The Department may require the permittee to conduct acceptable performance tests, at the permittee's expense, in accordance with Rule 1001 and Rule 1003, under any of the conditions listed in Rule 1001. (**R 336.2001**)

EMISSION UNIT SPECIAL CONDITIONS

EMISSION UNIT SUMMARY TABLE

The descriptions provided below are for informational purposes and do not constitute enforceable conditions.

Emission Unit ID	Emission Unit Description (Including Process Equipment & Control Device(s))	Installation Date / Modification Date	Flexible Group ID
EUCLEANUP	Miscellaneous cleanup activities using acetone.	TBD	FGSPRAYBOOTHS
EUBOOTH1	Spray booth equipped with dry fabric filters where composite plastic parts are produced, and urethane liner coating is applied.	TBD	FGSPRAYBOOTHS
EUBOOTH2	Spray booth equipped with dry fabric filters where composite plastic parts are produced, and urethane liner coating is applied.	TBD	FGSPRAYBOOTHS
EUBOOTH3	Spray booth equipped with dry fabric filters where composite plastic parts are produced, and urethane liner coating is applied.	TBD	FGSPRAYBOOTHS

Changes to the equipment described in this table are subject to the requirements of R 336.1201, except as allowed by R 336.1278 to R 336.1291.

FLEXIBLE GROUP SPECIAL CONDITIONS

FLEXIBLE GROUP SUMMARY TABLE

The descriptions provided below are for informational purposes and do not constitute enforceable conditions.

Flexible Group ID	Flexible Group Description	Associated Emission Unit IDs
FGSPRAYBOOOTHS	Three spray booths equipped with dry fabric filters where composite plastic parts are produced, and urethane liner coating is applied.	EUCLEANUP, EUBOOTH1, EUBOOTH2, EUBOOTH3

FGSPRAYBOOTHS FLEXIBLE GROUP CONDITIONS

DESCRIPTION

Three spray booths equipped with dry fabric filters where composite plastic parts are produced, and urethane liner coating is applied.

Emission Units: EUCLEANUP, EUBOOTH1, EUBOOTH2, EUBOOTH3

POLLUTION CONTROL EQUIPMENT

Dry filters on spray booths.

I. EMISSION LIMITS

Pollutant	Limit	Time Period/ Operating Scenario	Equipment	Testing / Monitoring Method	Underlying Applicable Requirements
1. VOC (including styrene)	5,000 lbs per year	12-month rolling time period as determined at the end of each calendar month	FGSPRAYBOOTHS	SC VI.2, SC VI.3	R 336.1225, R 336.1702(a)
2. Acetone (CAS No. 67-64-1)	3,000 lbs per year¹	12-month rolling time period as determined at the end of each calendar month	FGSPRAYBOOTHS	SC VI.2, SC VI.3	R 336.1224, R 336.1225

II. MATERIAL LIMITS

	Material	Limit	Time Period / Operating Scenario	Equipment	Monitoring / Testing Method	Underlying Applicable Requirements
1.	Styrene content of fiberglass resin	36.0% by weight as applied	Instantaneous	Each emission unit in FGSPRAYBOOTHS	SC VI.2	R 336.1225 R 336.1702(a)
2.	Styrene content of fiberglass gelcoat	37.0% by weight as applied	Instantaneous	Each emission unit in FGSPRAYBOOTHS	SC VI.2	R 336.1225 R 336.1702(a)
3.	VOC content of liner coating	1.8 lb/gal (minus water) ^a as applied	Instantaneous	Each emission unit in FGSPRAYBOOTHS	SC V.1, SC VI.2	R 336.1225 R 336.1702(a)
	^a The phrase "minus water" shall also include compounds which are used as organic solvents and which are excluded from the definition of volatile organic compound. (R 336.1602(4))					

III. PROCESS/OPERATIONAL RESTRICTIONS

- 1. The permittee shall capture all waste materials used in FGSPRAYBOOTHS and store them in closed containers. The permittee shall dispose of waste materials in an acceptable manner in compliance with all applicable state rules and federal regulations. (R 336.1224, R 336.1702(a))
- 2. The permittee shall dispose of spent filters in a manner which minimizes the introduction of air contaminants to the outer air. (R 336.1224, R 336.1370)
- 3. The permittee shall handle all VOC and/or HAPs containing materials in a manner to minimize the generation of fugitive emissions. The permittee shall keep containers covered at all times except when operator access is necessary. (**R 336.1225, R 336.1702(a)**)

IV. DESIGN/EQUIPMENT PARAMETERS

- 1. The permittee shall not operate any spray booth associated with FGSPRAYBOOTHS unless its respective exhaust filter is installed, maintained and operated in a satisfactory manner. (**R 336.1301**, **R 336.1331**)
- 2. The permittee shall equip and maintain the spray booths in FGSPRAYBOOTHS with non-atomized applicators, or technology with equivalent or lower styrene emission rates, which shall be used for application of any resin in FGSPRAYBOOTHS. (R 336.1225, R 336.1702(a))
- 3. The permittee shall equip and maintain the spray booths in FGSPRAYBOOTHS with mechanical applicators, or technology with equivalent or lower styrene emission rates, which shall be used for application of any gelcoat in FGSPRAYBOOTHS. (**R 336.1225, R 336.1702(a)**)

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1201(3))

1. The permittee shall determine the VOC content, water content and density of any coating, as applied and as received, using federal Reference Test Method 24. Upon prior written approval by the AQD District Supervisor, the permittee may determine the VOC content from manufacturer's formulation data. If the Method 24 and the formulation values should differ, the permittee shall use the Method 24 results to determine compliance. (R 336.1702, R 336.2001, R 336.2003, R 336.2004, R 336.2040(5))

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1201(3))

- 1. The permittee shall complete all required calculations in a format acceptable to the AQD District Supervisor by the last day of the calendar month, for the previous calendar month, unless otherwise specified in any monitoring/recordkeeping special condition. (R 336.1224, R 336.1225, R 336.1702(a))
- The permittee shall maintain a current listing from the manufacturer of the chemical composition of each material, including the weight percent of each component. The data may consist of Safety Data Sheets, manufacturer's formulation data, or both as deemed acceptable by the AQD District Supervisor. The permittee shall keep all records on file and make them available to the Department upon request. (R 336.1224, R 336.1225, R 336.1702(a))

- 3. The permittee shall keep the following information on a monthly basis for FGSPRAYBOOTHS:
 - a) The identity and amount (in pounds) of each material used.
 - b) The styrene content (in percent by weight) of each material used.
 - c) The acetone content (in precent by weight) of each material used.
 - d) The VOC (including styrene) content of each material used.
 - e) The appropriate emission factors for each raw material used. Mass balance is used for coating operations and cleanup operations; the Unified Emission Factors (UEF) Table 1 for Open Molding of Composites from the American Composites Manufacturers Association (ACMA), October 2009 may be used for fiberglass operations; or an alternate factor approved by the AQD District Supervisor.
 - f) VOC mass emission calculations determining the monthly emission rate in pounds per calendar month, and the annual emission rate in pounds per 12-month rolling time period as determined at the end of each calendar month.
 - g) Acetone emission calculations determining the monthly emission rate in pounds per calendar month, and the annual emission rate in pounds per 12-month rolling time period as determined at the end of each calendar month.

The permittee shall keep the records using mass balance, or an alternative method and format acceptable to the AQD District Supervisor. The permittee shall keep all records on file make them available to the Department upon request. (R 336.1224, R 336.1225, R 336.1702(a))

VII. <u>REPORTING</u>

NA

VIII. STACK/VENT RESTRICTIONS

The exhaust gases from the stacks listed in the table below shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted:

	Stack & Vent ID	Maximum Exhaust Diameter/ Dimensions (inches)	Minimum Height Above Ground (feet)	Underlying Applicable Requirements
1.	SVSTACK1	20	31	R 336.1225, 40 CFR 52.21(c) & (d)
2.	SVSTACK2	20	31	R 336.1225, 40 CFR 52.21(c) & (d)
3.	SVSTACK3	20	31	R 336.1225, 40 CFR 52.21(c) & (d)

IX. OTHER REQUIREMENTS

NA

Footnotes:

¹This condition is state only enforceable and was established pursuant to Rule 201(1)(b).
