Reopening (Rule 217(2)) Overview

Rule 217(2) describes reopening of an ROP for cause. A reopening must meet one of the following criteria:

- (1) To incorporate a new applicable requirement issued or promulgated after the issuance of the ROP if 3 or more years remain in the term of the permit. This must occur as expeditiously as possible, but not later than 18 months after promulgation of the applicable requirement.
- (2) To incorporate new applicable standards and requirements for affected sources pursuant to Title IV of the Clean Air Act.
- (3) If the Department determines that the permit contains a material mistake, the information required by any applicable requirement was omitted, or that inaccurate statements were made in establishing the emission limitations or standards or the terms and conditions of the permit.
- (4) If the Department determines that the permit must be revised to ensure compliance with the applicable requirement.

A reopening can only affect those parts of the ROP for which cause to reopen exists. It is very important to emphasize that fact in the associated documents, especially in the letter to the company, the Public Notice and the Staff Report.

I. Reopening (REO) Notification

Staff	1. Create a notice of intent to reopen the ROP using ROP Reopening Company Notification.dot .
Staff	a. If the REO involves a renewable non-ROP permit (e.g. Acid Rain Permit), address the letter to both the Responsible Official(s) (RO) and Designated Representatives(s) (DR). Contact Brian Carley if you need to confirm the current DR(s). Copy Brian on the letter.
Staff	b. Save as “SRN REO ROP Company Notification.docx.”
	The notice <u>must</u> be provided at least 30 days in advance of the date that the ROP is to be reopened and specify the reasons for the reopening.
Staff/Sec	2. MACES: Treat the REO notice as if it were an application submittal from the source. Enter into MACES the date that the REO notice was sent to the company as “Date Received.” (Although no application is submitted by the company, the date of the REO notice is comparable to an application received from a source for starting the issuance clock and is handled accordingly.) Click on “Application Type” and select “Reopening.” Click on “Staff” and enter the Staff Person assigned. Click the “Save” Button. “Reopening-Notice Sent to Source” will be displayed under the “Event Type” and the received date will show up under the “Event Date.” No further action is required in MACES at this time.

Add the small letter in sequential order to the ROP to indicate that the ROP has been revised, e.g. MI-ROP-Z9999-2011a. Do likewise if a Source-wide PTI is affected, e.g. MI-PTI-Z9999-2011a. d. Make the changes to the ROP that were specified in the notification to the company. If needed, insert the appropriate Optional Conditions from the ROP Shell template into the appropriate ROP table. V. REO Final

If EPA did not raise objections during the 45-day review period, the REO can be issued. If EPA objects to the issuance of the REO during the 45-day review period, Region 5 will initiate the process established in 40 CFR 70.8 (c).

Staff	<p>1. Staff Report:</p> <p>a. If EPA provides comments during the 45-day review period, add a second addendum to explain those comments and changes made to the REO. The date of the addendum is the REO issuance date. If no comments are received from EPA, do not add an addendum.</p> <p>b. Save the final Staff Report as “SRN REO Staff Report {MM-DD-YY}.docx.” Whether or not another addendum is added, the <u>REO Final</u> issuance date is required in the Staff Report file name. (If this is not done, the file name gives the appearance that the Staff Report was not completed.)</p>
Sec	
Sec	<p>2. Prepare the REO Final:</p> <p>a. Delete the “Proposed” statements. On the ROP certification page, insert the <i>date of reopening approval</i> in the “Revision Date.” If there were previous revisions, add the new date to the end of the string of dates. Make sure the small letter in sequential order has been added to the ROP, e.g. MI-ROP-Z9999-2011a and the Source-wide PTI if affected, e.g. MI-PTI-Z9999-2011a. The expiration date remains unchanged.</p> <p>b. Save the REO Final as “SRN REO Final {MM-DD-YY}.docx” using the final issuance date of the REO in the file name.</p>
Sec	
Sec	<p>3. Approval Letter:</p> <p>a. Create the approval letter to send to the RO using ROP Reopening Issuance Letter.dot. If the reason for the REO is to incorporate a non-ROP renewable permit, copy the DR(s) and Brian Carley on the letter.</p> <p>b. Save the letter as “SRN REO Letter with Final.docx.”</p>
