Major Source – New or Reconstructed Emergency SI > 500 bhp

Red text identifies options. Select the option that applies to the source and change the text to black. Delete red text that does not apply and renumber conditions if necessary.

Blue text is guidance or notes on the use of the template. Delete all blue text prior to issuing the final permit or submitting it with a permit application.

This template is for new or reconstructed emergency SI RICE greater than 500 bhp at a major source as applicable. The RICE is new or reconstructed if the date of installation or modification is after December 19, 2002.

If this template is being used for an ROP Reopening or Renewal, and the MACT conditions were established in a PTI, the appropriate footnotes which reference enforceability must be added to each applicable condition in the template.

Permit staff, if using in a PTI, change the UARs for R 336.1213(3) to R 336.1205(1)(a) in SC IV.1 and SC VI.2.

DESCRIPTION

40 CFR Part 63, Subpart ZZZZ - National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines (RICE), located at a major source of HAP emissions, new or reconstructed emergency, spark ignition (SI) RICE greater than 500 brake hp that does not operate or is not contractually obligated to be available for more than 15 hours per calendar year for the purposes specified in 40 CFR 63.6640(f)(2)(ii) and (iii) or is limited use. A RICE is new or reconstructed if the date of installation or modification is after December 19, 2002. {May add specifics for the affected EU(s).}
