Dear Mr. Joseph,

This is in response to your letter of August 24, 2018 regarding site visit of August 9, 2018.

We understand that it is permitted and necessary for you to visit our site from time to time to inspect and test operations. We have been extremely short handed this year, and on the day you were here, we did not have anyone to escort you around the yard. My son, Douglas, was running the loader for the crusher and the other workers were in the booth or on the ground. It was "all hands on deck". I have been making most of the trucking deliveries, so I was out of the yard.

I am aware that your inspections are unannounced, but I cannot guarantee that this will not happen again in the future. I invite you to come and observe our operations, which we believe is one of the "cleanest and most efficient" in the area. However, as I stated, I cannot always be at the yard to accompany you.

Sincerely,

*Robert J. Clancy*  
Robert J. Clancy
