| FACILITY: Cheboygan Cement Products - St. Ignace | | SRN / ID: B5170 |
| LOCATION: Cheeseman Road, SAINT IGNACE | | DISTRICT: Upper Peninsula |
| CITY: SAINT IGNACE | | COUNTY: MACKINAC |
| CONTACT: GREG GILDNER , OWNER | | ACTIVITY DATE: 06/08/2016 |
| STAFF: Joel Asher | COMPLIANCE STATUS: Compliance | SOURCE CLASS: |
| SUBJECT: Concrete batch plant | | |
| RESOLVED COMPLAINTS: | | |

On 6/8/2016 I conducted an unannounced inspection of this facility. The site was unattended.

The facility is a concrete batch plant. This is a relatively small operation that is not manned on a continuous basis. There appeared to be a new baghouse on top of the cement silo.

On 6/9/16 I talked with Mr. Greg Gildner, the owner, on the telephone. Mr. Gildner stated they replaced the baghouse about 2 years ago. They continue to inspect the baghouse at the beginning of each construction season. Spare bags are kept.

Concrete production for 2015 was about 1000 cubic yards. So far they have produced 80 yards in 2016. Typically they maintain a production of between 500 to 1000 yards per year. They receive between 5 to 6 loads of cement each year.

No complaints have received regarding this facility. It appears they are in compliance with PTI# 459-96.
