RESOLVED COMPLAINTS:		

Unannounced inspection of Steeltech LTD.

Prior to entering the facility, staff made observations from Phillips Street. While driving past the facility heading south on Phillips Street, staff noted that the gum they were chewing became gritty. Staff drove back to the the facility and noted particulate being emitted from the outlet of the baghouse located about 30 feet from the main entrance of the facility. Staff entered the facility and met with Greg Schuetz, Human Resources Director. Staff showed Mr. Schuetz the particulate being emitted from the baghouse exhaust with opacity of approximately 30%. The baghouse controls emissions from EUSANDRECLAIM, which is the facility's sand reclamation unit covered under PTI No. 59-03A.

Staff informed Mr. Schuetz that a VN would be issued to address the particulate emissions. The facility will be cited for failing to maintain and operate the baghouse in a satisfactory manner (SC 1.2, Rule 910).
