Erik A Gurshaw
Environmental Quality Analyst
Air Quality Division
RE; State Crushing Inc. – East 25501 Sherwood Warren, MI

Dear Mr. Gurshaw,

I am writing in response to the violation letter we received.

Violations occurred on September 3, 2015.

- 1) Appendix B – fugitive dust control plan of PTI number 154-12. We are currently keeping a log book of each application of water, sweeping, and application of calcium chloride. We have added additional water/spray units to the plant and around the building , increased sweeping of road (Sherwood) and yard by sweep master from 2 times a month to 3 times. Having calcium chloride applied to yard and drive areas once a month under contract with Big Barneys. We have also added additional concrete hard surface at the entrance/exit of our yard.
- 2) Special condition IX under EUPROCESS – We have since Numbered the plant per permit requirement, using the ID numbers in appendix A.

Sincerely,

R.J. Orozco
Vice President

State Crushing Inc. East
