I am writing you in response to the violation notice dated April 15, 2016

The violation was "special condition III 1. " Paved roadway was not swept." Which occurred on April 5th 2016. This was an issue for about 2 1/2 hours due to weather condition and at first sight of track out we called the sweeper truck . The sweeper truck was in route when you were here to inspect. Road way was swept of all debris by the end of the day. This was the immediate correction, however we have since put in place a long term plan which includes all unpaved road way will be tops with asphalt millings, and over top that we will place 1 x 3 crushed concrete. This is about 90% finished we also have had calcium Chloride applied to the entire yard. WE will also be installing Rumble Stripes to both sides of our scale. We hope to have that completed in the next 30days.

Thank you,

RJ Crozco -- Vice President
State Crushing, Inc.
