

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Self Initiated Inspection

M416337438

FACILITY: Summit Petroleum-Richmond CTB		SRN / ID: M4163
LOCATION: 10585 W 5 Mile Road, REED CITY		DISTRICT: Cadillac
CITY: REED CITY		COUNTY: OSCEOLA
CONTACT:		ACTIVITY DATE: 10/04/2016
STAFF: Rob Dickman	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: Self initiated inspection of this minor source		
RESOLVED COMPLAINTS:		

This facility processes crude oil and natural gas. All of the gas collected at the facility is sour and is consumed by the flare. Oil and brine is collected is stored in two above ground 400 barrel storage tanks and trucked away. At the time of the inspection, no sour odors from the facility were noted downwind. Opacity from the flare was 5-10%. Following is the results of the rest of the inspection by permit condition:

FG-FACILITY

1.1 The permittee shall not operate FG-FACILITY unless all gas is burned in EU-FLARE. At the time of the inspection, the flare was in operation and plumbing to it appeared correct and did not appear altered.

EU-FLARE

2.1 The permittee shall equip and maintain EU-FLARE with an automatic ignition system. The flare was in operation at the time of the inspection and appeared to have this system in place.

2.2 The flare is required to be at least 30 feet above ground. The flare did not appear to have been altered and appeared to meet this criteria.

At the time of the inspection, this facility appeared in compliance with their air permitting.
