Dear Wayne Ferris:

VIOLATION NOTICE

On July 21, 2022, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Tribar Plant 1 located at 30517 Andersen Court, Wixom, Michigan. The purpose of this inspection was to determine Tribar's Plant 1 compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 274-98A.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
FG-COATLINE	Special Condition 14	Facility was exceeding temperature of 194 °F when air-dried automotive coatings are being cured. During the inspection, a temperature of 207° was observed. During a meeting with Tribar staff Ryan O'Keefe and Darrel Dotson on August 26, 2022, it was indicated this limit may have been exceeded for at least two years.
FG-COATLINE	Special Condition 18	Facility has not provided records of the cure oven temperature records for the previous six months, which were requested multiple times. AQD is now requesting previous two years of cure oven temperature records based on conversation with Tribar staff.
