4 October 2021

EGLE, AQD, Kalamazoo District  
7953 Adobe Rd Kalamazoo, MI 49009

Dear Sir or Madam:

This is a written response to the violation notice sent by Monica Brothers on Sept. 24<sup>th</sup>, 2021, from her June 8<sup>th</sup> inspection. Azon does not believe we are in any violation to the findings on June 8<sup>th</sup>. The process in which we have been operating and producing has not changed in over 20 years. The last inspection from Bob Always Dec. 13<sup>th</sup>, 2008, stated that our facility was in compliance with air pollution control rules.

Azon is in the process of obtaining a consultant to calculate our emissions and determine if we are exempt or not. Once we have this information Azon will be in contact with EGLE to notify of the findings from the outside consultant.

Sincerely,

Gareth Mills  
Quality and Environmental Manager
