Mrs. Kaitlyn DeVries
Environmental Quality Analyst
Air Quality Division

Dear Kaitlyn,

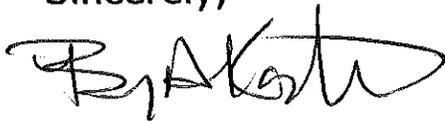

I would like to thank you and your colleagues for the pleasant experience during our facility inspection conducted on Friday July 26th. I found the inspection very helpful and learned some things that we can improve on.

In response to our violation that was cited on 7/26/19, I would like to inform you that we have taken action to correct the violation. Quite honestly, I did not know that we had been issued an Air Permit back in March of 1997. Therefore, I simply was not aware that we were supposed to keep records of our hours of operation for our chlorine process.

On Monday July 29, 2019 I created a couple of spread sheets and began tracking our daily, monthly and annual hours of operation. I have included two spread sheets for your review. The first shows the daily totals from July 29 – August 14, 2019. The second shows monthly and annual totals, again beginning on July 29 – August 14. This has become part of our daily production recording.

If you have any questions or concerns please feel free to contact me at (616) 957-0281 or bryank@tabletinginc.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Bryan Koster". The signature is fluid and cursive, with the first name "Bryan" and last name "Koster" clearly distinguishable.

Bryan Koster
President
Tableting, Inc.
