<b>CONTACT:</b>		<b>ACTIVITY DATE:</b> 05/12/2022
<b>STAFF:</b> David Bowman	<b>COMPLIANCE STATUS:</b> Compliance	<b>SOURCE CLASS:</b> MINOR
<b>SUBJECT:</b> Unscheduled Inspection.		
<b>RESOLVED COMPLAINTS:</b>		

I, David Bowman EGLE AQD, conducted and unscheduled inspection of N6117. From M33 travel east on CR 451/Chester Rd until it ends at Klein Rd. Turn South and travel until Kelin rd turns east and becomes Webber Creek. South at the turn is a gate and several private property signs. Continue South for 0.5 miles an the facility is on the West side of the road.

The site was operating when I arrived and there was no discernable odors or VE from the stack. Site had operated under PTI 675-96 until it was voided in 2007.

The Compressor Skid was labeled GCS 894 and that matched the unit # on the controls. The daily check sheet was being filled out and the operational parameters have very little deviation from day to day. Current operating hours appear to be 29133.6 although the 29 was very dim by comparison to the 133.6. The engine has no control and vents horizontal to a muffler outside the building then a vertical discharge approx 15' AGL with a 16-20" diameter pipe.
