List of Partial Compliance Evaluations :

Activity Date	Activity Type	Compliance Status	Comments
07/27/2018	Scheduled Inspection	Compliance	The purpose of this inspection was to determine compliance with Permit to Install (PTI) Numbers 361-06F and 340-08C as well as other applicable air quality rules and regulations.
06/08/2018	Other Non ROP	Compliance	The report for the annual natural draft opening (NDO) testing required by PTI No 361-06F Special Condition V.3 for EUDIPLINE2 was received on June 4. A Nextteq irritant smoke tube kit was used for air flow indication. The testing, while conducted late, indicates that flow is into the enclosure from all access points.
05/04/2018	MAERS	Compliance	MASS balance and MAERS emission factors were primarily used by the facility to calculate emissions. The attachments allowed for the emissions to be verified. The only large change in emission was for EULINE1, but this is consistent with the changes they made to their permit, and are reflective of what would be expected. No changes have been made to the report. 5.4.2018. KDeVries

Activity Date	Activity Type	Compliance Status	Comments
03/12/2018	Stack Test	Compliance	The results of the VOC Destruction Efficiency Testing for EULINE1 conducted on February 14, 2018 pursuant to PTI No. 361-06F was received on March 12, 2018. The three (3) run average Destruction Efficiency (DE) was 99.88%. In conjunction with the DE testing, Almond Products was required to conduct an air flow test to ensure that all natural draft openings (NDO's) flowed into the enclosure. The testing indicated that the are flow at all NDO's was into the enclosure. The passing results of this test resolve the Violation Notice issued on 11/3/2017.
02/14/2018	Stack Test Observation	Compliance	EULINE1 stack test observation.
