

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Scheduled Inspection

N745832657

FACILITY: BREITBURN OPERATING LP - NADV 7		SRN / ID: N7458
LOCATION: WARNER TWP SEC 31 T31N R4W SE SE SE, WATERS		DISTRICT: Cadillac
CITY: WATERS		COUNTY: OTSEGO
CONTACT: Carolann Knapp , Environmental Specialist		ACTIVITY DATE: 12/02/2015
STAFF: Rob Dickman	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Scheduled inspection of this opt out source.		
RESOLVED COMPLAINTS:		

Inspected this opt out source against Permit to Install number 242-05. No visible emissions or odors were noted.

An inventory of equipment on site was as follows:

- 2 exempt AST's (both were 400 bbl) without vapor recovery
- 1 small uncontrolled V-8 booster engine
- 1 V-16 compressor engine (EUENGINE) with catalytic control, not in operation
- 1 glycol dehydrator, not in operation

The compressor engine and glycol dehy have had feed to them completely cut off and the lines feeding them have been rerouted. A records review noted that this equipment has not been in operation in the last 12 months. A representative for the facility indicated that this equipment has not operated since September of 2013. She also indicated that the equipment was for sale and the facility had no intent to operate it at this location in the future.

Given that the equipment has not operated in over 18 months, feed lines have been cut and removed from the vicinity of the equipment, wells feeding this equipment have been rerouted to other locations, the equipment has been pickled and not maintained during this period, and the company has indicated there is no intention to reconnect and restart the equipment, it is recommended that this permit be voided.
