SUBJECT: 2014 FCE site inspection and records review.		SOURCE CLASS: SM OPT OUT
RESOLVED COMPLAINTS:		

Full Compliance Evaluation

I conducted a site inspection of this facility on April 24, 2014. At the time of the inspection the equipment on site included 2 tanks in a containment area or compressor/engine and one dehy. Neither the compressor/engine or dehy were operating. The engine is a CAT 398 V-12 with a catalytic converter and AFRC. The most recent maintenance log for the compressor/engine was dated 12/2011.

The 2013 MAERS report was submitted and indicates the plant did not run in 2013. According to MAERS, the plant has not run since 2011.

The plant has not operated during the period under review and there are no outstanding compliance concerns. Information provided by JDC indicates that they plan to move or sell the compressor/engine.
