RESOLVED COMPLAINTS:		

On December 18, 2018 AQD staff traveled to Otsego County to perform an inspection of the Ward Lake Energy Vienna 18 CPF. The purpose of the inspection was to determine the facility's compliance with Permit to Install No. 395-07 and applicable state and federal air pollution control regulations. AQD staff noted that the facility permit consists of a compressor engine.

AQD staff arrived on site at 12:37 p.m. to cloudy conditions with a temperature of 27°F and a S wind of 9 mph. There were no noticeable odors upon arrival.

Upon arrival to the facility location, AQD staff noted that the facility has been removed. AQD staff referenced GPS system, Google Earth, and facility location from previous inspections to assure the location was correct. The facility name plate was still on location for further reassurance of the correct location. AQD staff noted that all permitted equipment has been removed from the location.

AQD staff has requested to review records for the facility. Due to permitted equipment being removed from the facility, as well as the engine shed and tank battery removal, AQD staff will request a void for this facility.
