Ms. Jenine Camilleri
Enforcement Unit Supervisor at EGLE AQD
PO Box 30260
Lansing, MI 48909-7760

Dear Ms. Camilleri

In response to the Violation notice of Rule 901(b) received on 6/21 please find a copy of the DRAFT Odor Control Plan that was previously submitted on 7/9 to the MMD. This plan lays out plans to take the necessary corrective actions to resolve the nuisance odors associated with the lagoons. We met with the MMD and AQD on 7/11 and discussed the plan and its implementation and are awaiting comments back from MMD. Generate Fremont Digester has already started procuring the necessary material and supplies to execute both the biological and chemical treatment of the lagoons proactively prior to receiving formal comments back from the MMD and finalization of the odor control plan.

We have started and will continue to include Kaitlyn on all correspondences and updates related to odor control that we have with the MMD group.

Please let us know if you have any questions.

Kind Regards,

A handwritten signature in black ink, appearing to read "Dan Meccariello".
