Dear John Thompson:

VIOLATION NOTICE

On July 6, 2022, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Stateline Crushing located at 3566 Millcreek Avenue, Comstock Park, Michigan. The purpose of this inspection was to determine Stateline Crushing's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the Air Pollution Control Rules.

During the inspection, staff observed the following:

Process Description	Rule/ Permit Condition Violated	Comments
500 Ton Per Hour KPI-JCI nonmetallic mineral crushing plant	Rule 201	Failure to obtain a Permit to Install

During this inspection, it was noted that Stateline Crushing had installed and commenced operation of an unpermitted process at this facility. The AQD staff advised Stateline Crushing on July 12, 2022, that this is a violation of Rule 201 of the administrative rules promulgated under Act 451.

A program for compliance may include a completed PTI application for the 500 ton per hour KPI-JCI nonmetallic mineral crushing process equipment. An application form is available by request, or at the following website: www.michigan.gov/air.

Be advised that Rule 201 requires that a permit be obtained prior to installation, construction, operation, reconstruction, relocation, or alteration of any process or process equipment which may be a source of an air contaminant.
