

Plant

April Lazzaro
DEQ – Air Quality Division

Dear Ms. Lazzaro,

On June 8th Dynamic Crushing LLC was cited with the violation of not meeting the 500' setback rule from commercial and residential areas. Dynamic Crushing LLC plant operator had forgotten about the 500' setback before commencing crushing operations. When the violation notice was served, Dynamic Crushing LLC, acquired a laser range finder to ensure that the 500 feet setback would be established in the future, a site specific permit was applied for and approved by the Air Quality Division on July 1st. Dynamic Crushing also increased our water dust suppression equipment by adding an addition spray bar over the crusher inlet and feeder.

Dynamic Crushing LLC will ensure that any adjoining residential and commercial establishments are a minimum of 500' from the crushing operations, and that sufficient dust control measures are in place moving forward.

Please let me know if there are any questions or concerns.

Sincerely,

Greg Huyser

Owner

Dynamic Crushing LLC
