SUBJECT: Violation Notice Response

This response letter is regarding an inspection conducted on August 31, 2021. We were in violation of the Material Limits specified in Special Condition II.2.b of PTI number 86-20. This Special Condition requires that the chlorine content for caster wheel polyurethane coatings not exceed 1% by weight and we were at 1.33%

To address this violation, we have ceased burning off all casters until a modification to permit 86-20 is made to increase the chlorine content limit of the polyurethane. The violation is not ongoing. Once permit is modified and burn off of casters is resumed, we will check in with customer annually to confirm the chlorine contents do not exceed the new allotted percentage. This will ensure we remain in compliance of Special Condition II.2.b of PTI number 86-20.

Application to modify permit will be submitted week of November 15th.

Please feel free to contact me with any questions or concerns.

Respectfully,

Tyler Lang
