Elsie, Michigan 48831

Julie L. Brunner, P.E.

Senior Environmental Engineer

Air Quality Division

1-2-2018

In response to our violation notice SRN U1916122206, Clinton County.

A summary of the actions that have been taken and are proposed to be taken to correct the violations:

We have shut down our old sandblasting room and totally redone it with fixing all the holes, foam insulation on the walls and ceiling, and installing rubber backing and then steel on the walls and ceiling. Enclosed the equipment room and installed collection/control equipment to prevent the release of dust and sand blasting media to the ambient air.

The dates by which these actions will take place:

The lights for the existing sandblasting room will be here 1-5-2018. The plan is to have the room totally up and running Tuesday 1-9-2018.

Our staff has been working with Grand Northern Products, Ben Dykstra on the sandblasting equipment and operations.

The steps being taken to prevent a reoccurrence and the date the new sandblasting operation will be installed and in use:

The new sandblasting building is waiting for the equipment to be delivered. The plan is to have it running May 1, 2018.

We are a small business and of course everything cost alot of money. We are very conscious of the environment and quality of the air. It was not our intention to cause KP Auto Body or any body in the area any harm.

Thank you,

William E. Jones
