DEC 03 2019

Dear EGLE,

Bees Prep and Asphalt Inc. has received the violation notice dated October 22, 2019. On October 19<sup>th</sup> 2019, while working at the Lansing Mall, Bees was using a saw cutter and water pump that was not working properly. The water pump attachment that is used to keep dust from flying into the air failed. Our employee did not report the failure and continued to saw cut without the water pump. Due to the pump failure, saw cutting caused some dust to fly around the area. Bees has sent the water pump and saw to be repaired. The pump was found to have some damaged fuel seals and a clogged hose, this caused the pump to malfunction. This will not be an ongoing issue at Bees. We have put a memo and had a safety meeting with all employees informing them if ANY equipment is malfunctioning, they are not permitted to use it until repairs are made. We also reminded all Bees employees to use water while saw cutting concrete to keep dust from flying in the air, every time, no exceptions.

Sincerely,

Annette Gonzales, V.P.  
Bees Prep and Asphalt, Inc.
