none

**MAERS Emission Unit List**

none

**Inspection Summary**

This inspection occurred directly after the inspection of the Monroe Rubbish site located on Featherly Drive and identified by SRN U 471604422.

We arrived at the location at about 2:25pm. The site is for the most part all paved or capped with cement. Any areas not paved are inaccessible to truck traffic. All heaters onsite are fueled by natural gas. There was a trailer that was freshly painted black next to a maintenance building. This trailer was painted at the other location and information on painting (287(c)) was provided in hard copy.

There were no concerns identified during this inspection.
