

Attn. Joseph Scanlan

I Bruce Gusts have never done this before. Enclosed are all the paper work I received from the Carp Lake township. Green light to go ahead with the demo of the gas station, Mobil in White Pine finding out there were other measures involved and am doing my best to be in compliance with the laws and regulations. Here is the papers I received. Apologize for any inconvenience.

 Carp Lake Township
 P.O. Box 397
 White Pine, MI 49971
 Twp: (906) 885-5884 Cell: (906) 281-0853

Building Inspector:
Richard Wainio
 Box 236 #15365
 Ewen, MI 49925
 (906) 988-2232

If you intend to: build-new, add-on, alter, renovate, demolish, or relocate within the jurisdiction of Carp Lake Township, steps 1 and 2 must be cleared **before** a building permit application can be submitted:

1. Water supply and septic system permits including "out houses" from the Western U.P. Health Department. 408 Copper Street Ontonagon, MI 49953 P(906) 884-4485 F(906) 884-2358

2. Soil erosion permit from the Soil Erosion and Sedimentation Control Officer.
 William Johnson 725 Greenland Rd. Ontonagon, MI 49953 (906) 884-4980

After 1 & 2 are completed:

1. Fill out the building permit application including a full description and scope of the intended project. Please ensure that your construction project stays **fully within the scope** of this application and permit.
2. Please include the address and general directions to the project site. Be sure to sign your name.
3. Per our conversation, pay the fee listed on the application under your signature. Make payment in the form of check or money order to "Carp Lake Township" and mail to the address listed at the top of this page. If you have questions on listed building permit fees, I can be contacted at the phone number above.
4. Finalize the application by providing a project layout/sketch on the grid located on the back page. Please include dimensions and property lines on the sketch. In addition, please attach a construction **print view** with the application.
5. **Common Zoning items to consider:**
 - a. We will schedule a time to meet and discuss any zoning issues that may need to be addressed.
 - b. **Please locate your property lines and stake out the project area.**
 - c. Check setback from property lines for the zoning district in which the project will be constructed.
 - d. If you are excavating: Call Miss Dig at 1(800) 482-7171, and be aware of overhead power!
6. When all zoning requirements are verified:
 - a. Zoning will file the completed application at the township and upon receipt of payment, issue the building permit to the building inspector who will issue your permit to you.
 - b. Any construction questions can be addressed to the building inspector, contact info. at the top of the page.

SURVEY

On May 19, 2018, Dale Carrier, a Michigan License #A39230 Asbestos Building Inspector, conducted a survey on the former Mobile Mart located at 29211 M-64 in White Pine, Michigan.

The building which was partially demolished was formerly a gas station convenience store. A total of ten samples of suspected material were taken from the existing building and from the debris pile. Samples included drywall, joint compound, floor tile, black mastic, roofing materials, and window glazing.

The results show asbestos in the silver coating on roofing materials and window glaze. The results are included in this report.

Recommendations

To comply with DEQ regulations no CDD (construction and demolition debris) may leave the site with any asbestos containing materials specifically roof materials and/or window glaze. To comply with Michigan OSHA and DEQ regulations, the remainder of the building must be demolished by a Michigan licensed asbestos abatement contractor. The asbestos containing materials must be removed before and disposed of separate from CDD materials and disposed of at a qualified landfill as non-friable asbestos materials.

If you have any questions, please feel free to contact me by telephoning 906.250.6710 or by email dale@upabatementco.com.

Sincerely,

Dale Carrier, Upper Peninsula Abatement Company Incorporated

The condition of the samples analyzed was acceptable upon receipt per laboratory protocol unless otherwise noted on this report. Each distinct component in an inhomogeneous sample was analyzed separately and reported as a composite. Results represent the analysis of samples submitted by the client. Sample location, description, area, volume, etc., was provided by the client. This report cannot be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government. This report shall not be reproduced except in full, without the written consent of the Environmental Hazards Service, L.L.C. California Certification #2319 NY ELAP #11714 NVLAP #101882-0 VELAP 460172. All information concerning sampling location, date, and time can be found on Chain-of-Custody. Environmental Hazards Services, L.L.C. does not perform any sample collection.

Environmental Hazards Services, L.L.C. recommends reanalysis by point count (for more accurate quantification) or Transmission Electron Microscopy (TEM), (for enhanced detection capabilities) for materials regulated by EPA NESHAP (National Emission Standards for Hazardous Air Pollutants) and found to contain less than ten percent (<10%) asbestos by polarized light microscopy (PLM). Both services are available for an additional fee.

400 Point Count Analysis, where noted, performed per EPA Method 600/R-93/116 with a Reporting Limit of 0.25%.

* All California samples analyzed by Polarized Light Microscopy, EPA Method 600/M4-82-020, Dec. 1982.
